

Internet Online Update for Pump Selection Software HOP.SEL 2.0
1st of July 2022, Version 01/2022

Dear HOMA Partner,

we have extended the HOMA product range by:

50Hz

- **Complete set for quick drainage of construction sites**
- **Chopper pump**

Bau-Box R
OC2X(32-40)... / 2-pole

60Hz

- **Chopper pump**

OC4X(160-200)... / 2-pole

Accordingly we also have updated our Pump Selection Software HOP.SEL 2.0. You can download this update 01/2022 from the Internet.

Please consider that all HOP.SEL update files have to be installed in chronologic order. Before starting the update, please check which HOP.SEL version you have installed on your computer. You will find the version number in the main window during the HOP.SEL start (for example **Version 01/2013**). Then install all updates with higher version number, which have not yet been installed previously, in ascending order.

To do the Update, please open “**Extras**” in the upper menu bar of HOP.SEL and choose “**data update via internet**”. You will see all available updates now. Choose the required version (e.g. “**01/2015**”) and confirm with the “**OK**” button. When the window “**There are Updated files. Import these files now?**” appears, confirm “**yes**” and the new data will be downloaded in your HOP.SEL database.
