

# COMFORTABLE OPERATION BY APP

The new PCM Pump control, with HOMAApp

- › Maximum ease of use
- › Easy configuration
- › Comfortable design

## »» INNOVATIVE PUMP CONTROL

The new PCM pump control sets standards in the operation and monitoring of wastewater disposal units and pump stations. The control consistently implements the requirements for the particular application of a control in a sewage pumping station. For a cost-optimised design, a basic configuration was used in the control, which fully meets the need for a reliable system.

# » OUR EXPERTISE - YOUR ADVANTAGE

## New standards:

In developing the new PCM pump control, value was placed on using innovative technology to ensure maximum comfort when handling the pump system. All the basic control and monitoring functions are available using the control.

## The smartphone HOMApp:

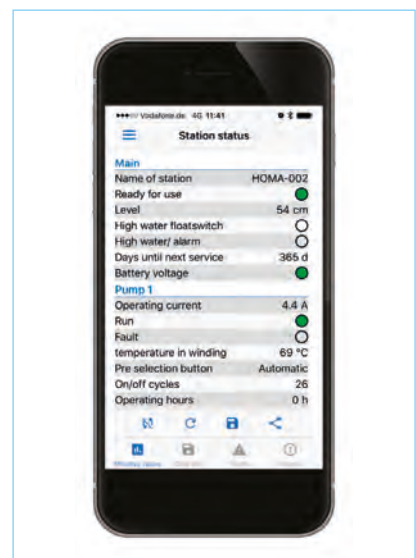

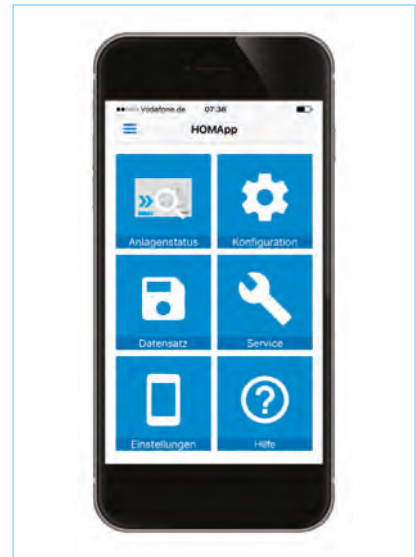

Available for iOS and Android operating systems. The smartphone APP HOMApp facilitates the configuration, commissioning, diagnostics and troubleshooting of the system with

its extensive functionality. The HOMApp provides intuitive and convenient operation via a graphical user interface.

The controller communicates with HOMApp via Bluetooth. This wireless connection ensures communication even in poorly accessible pump works without a GSM or GPRS network. The data stored on the smartphone from the controller can then be connected to the available network later.

## PCM & HOMAPP: CONVINCING PERFORMANCE

- A controller with many applications
- Mountable on cost-saving narrow outdoor columns (projects for pressure drainage)
- Low type diversity, each control unit can be adjusted to all common requirements and level measurements by means of the configuration and parameterisation
- Easy commissioning through the use of default settings
- Integrated, tested parameter data can be downloaded for free over the HOMA server
- Project-specific parameter data can be stored centrally on the HOMA server.
- Special menu for commissioning: all relevant settings are clearly arranged under this menu item
- Online system status (even without a network connection)
- Maintenance intervals can be viewed
- System status can be read
- Sending of the system status by email
- Pre-equipped for connection to smarthome systems

## HOMA Product Range

- ▶ Submersible waste water pumps
- ▶ Deep-well submersible pumps
- ▶ Submersible sewage pumps
- ▶ Submersible grinder pumps with cutter system
- ▶ Waste water disposal units
- ▶ Sewage disposal units
- ▶ Packaged pump stations
- ▶ Mixers and flow generators
- ▶ Injector systems for tank cleaning
- ▶ Garden pumps and domestic booster units
- ▶ Propeller pumps
- ▶ Control boxes

## Worldwide Presence

HOMA pumps are installed in more than 100 countries around the world – in countless projects of various kinds. They comply to all international safety and quality standards and are certified by many institutions and organisations responsible for national waste water treatment standards. To maintain and further develop this high quality level is our main target.

## Network of Sales and Service Partners

HOMA provides a worldwide network of agents and distributors supporting our customer with excellent sales and service assistance in planning, specification and selection, including a computer software program available on CD-ROM or form the WorldWide-Web.
